## EVENTS NEWSLETTER

From the “pop” of the champagne cork to raising your glass with a toast alcohol has become an important element to many events. Just as a restaurant or bar has alcohol licensing so too does your event center. Here are a few tips to help you as your event day approaches.

### Beer

We probably see more beer purchases than any other type of alcohol at our venue. We have distribution relationships with the major providers (Budweiser, Coors, Miller). These distributors also provide some of your major “craft” labels (Deschutes, Sierra Nevada, Stella) along with distributing some of our local craft labels (Slate Creek, Selkirk Abby).

### Wine/Champagne

Most people ask for a simple “Red” and “White” wine option for their wine selections. Others are much more specific on what they are looking for. Wine prices do run the gamut so be prepared for “sticker shock” if you choose an expensive option. The same goes for champagne. If you are just using champagne for a toast, it is best to go with a lower cost option.

### Liquor

Because of liquor laws in the State of Idaho we have only one resource that can provide liquor at our venue at this time. Should you choose to have liquor served we will connect you with this resource to work with you on all your alcohol choices for your event.

### Signature Drinks & Cocktails

If you are looking to have a signature drink served at your event, we will connect you with our liquor resource to make that happen. If you would like something along the lines of a “hard lemonade” that is pre-packaged we can serve that at your event. If it is available at the grocery store in Idaho, we can get it.

We will provide you a menu of what we carry and prices approximately 60 days prior to your event. We can work with our distributors to get something for you that may not be on the list. The bar operations are flexible with either a cash/pay by the drink or a hosted bar. As always, our bartender is included in your site fee and tips are appreciated.
